

### **REDUCER 00VRO9000**

It's a liquid reducer which lower the tack and viscosity of printing ink which improves dot sharpness. For best result add maximum of 3 percent.

### **DRIER 00DAT8835**

8835 is a liquid mixed drier which promotes hard dried film. It will work well on the oven so does not affect the duct freshness of the ink . Up to %3 can be added.

### **EXTENDER VARNISH 00TOF7783**

A highly transparent varnish for making inks lighter in hue and improve their printability.

### **TRANSPARENT WHITE 10TOF9601**

It's a pigmented transparent white for extending and colour mixing of shades and also improve opacity.

### **OPCIFICER (00TFO9303)**

To make opaque effect on print surface add 5-10% to ink and then pour ready ink in ink duct

### **ANTI MISTING PASTE**

To decrease and overcome misting of ink in printing house add 5-10%to ink
