

Persia Ink

UV FLEXOGRAPHIC INK

UV FLEXOGRAPHIC INK

This series with high color strength and balanced viscosity and flow designed for flexographic system specially for printing on labels .

Properties:

- High colour strength
- High gloss
- Excellent scratch resistance
- Excellent uv light polymerisation

•Colour

| | |
|--------|-----------|
| Yellow | 20FUV4420 |
| Red | 30FUV4430 |
| Cyan | 40FUV4440 |
| Black | 80FUV4480 |

Additives

Reducer **00OUV4200**

In order to lighter the colour and also improve the flow add %10 to inks .

Drying additive **00DUV9686**

For high ink thickness adding %3 speed up the polymerisation process and hard through dry film

Cleaners

00SLV4238

Acological solvent with mild odour. Miscible with water . Mix with %30 water and use.

00SLV4237

Good solvent and controlled evaporation .

00SLV2520

Very strong and effective solvent decrease the power mixed with %50 isopropyl alcohol

Shelf life

6 month if stored in temperature below 20°C . lower the temperature increase the shelf life . Close the cans after use . Store in cold , dry places . Uv inks start polymerisation from the bottom of cans .

Package

2.5 kg vacuum cans

1 k.g vacuum cans
